

ZENITH 701 VW POWER!

We have powered many Zenith 701's with our Reduction Drive engines. We can provide you with a kit or an assembled engine. Your choice of single or dual ignition.

The VW reduction drive engine can turn a prop diameter of 72" with the 1.6:1 ratio and provide you with about 350 lbs. of static thrust. This is definitely an economical option when compared to the Rotax 912!

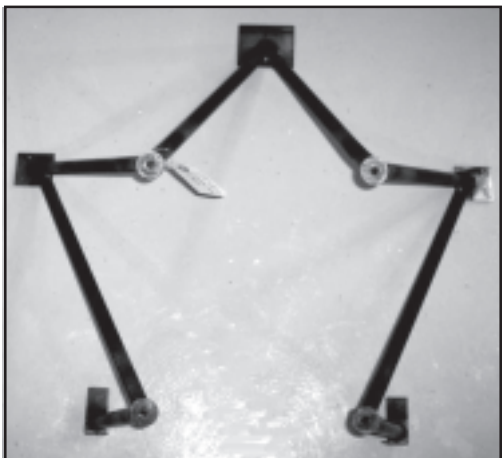

The most popular engine options for the 701 are:

2180cc or 2276cc Reduction Drive Long Block Kit	\$3030.00
1.6:1 Reduction Drive - Series 3	\$1595.00
Reduction Drive Accessory Package #1 (with Weber Carb)	\$1603.44
Total 2180cc or 2276cc Reduction Drive Engine Kit, Reduction Drive and Accessory Pkg #1	\$6228.44
or	
1915cc Reduction Drive Long Block Kit	\$2895.00
1.6:1 Reduction Drive - Series 3	\$1595.00
Reduction Drive Accessory Package #1 (with Weber Carb)	\$1603.44
Total 1915cc Reduction Drive Engine Kit, Reduction Drive and Accessory Package #1	\$6093.44

Options:

Dual Ignition - Accessory Package #7	\$797.92
Engine Assembly & Crating	\$550.00

We supply many 701 builders with an engine mount for their VW reduction drive engine - that keeps the prop hub centerline in the factory position.

Also we have a u-build exhaust from which the builder can fabricate their own custom exhaust.
